# New Product Announcement
## Rugged, high performance handhelds

**GPSMAP 62**                    **GPSMAP 62s**

Garmin Distribution Africa is pleased to announce the next generation in rugged handhelds: the GPSMAP 62 series. GPSMAP 62 products offer all the features and capabilities that were found in the GPSMAP 60 products, plus much more. With a new design and must-have features, these rugged GPSMAP 62 units are a great fit in Garmin's best-selling line up of colour outdoor handhelds.

The GPSMAP 62 series takes recreational navigation to a new level. The units feature a bright 2.6-inch (6.6cm) 65k colour LCD display with a built-in basemap and a high-sensitivity GPS receiver with HotFix[®]. Both models boast unparalleled reception with a quad helix antenna, are waterproof, have a worldwide basemap with shaded relief and support paperless geocaching.

In addition to the standard feature set on the GPSMAP 62, the 62s version adds a 3-axis compass, a barometric altimeter and a built-in microSD card slot for loading additional maps.

**Product Features and Specifications**
