A year-end message for all PROJECT MANAGERS

2021 Points and Pointers!

Here's thanking customers for loyal support in 2020 – and a friendly reminder to send in equipment¹ for repair and service as early as possible!

We don't need old Chinese proverb to tell us:
"Reworks cost ten times more than one time good work with adjusted instrument!"

- **Allen training courses with online options**

Upskill your workforce for technical challenges in engineering survey and radiation safety, Learn the new methods and keep compliant with legal updates. Schedule now for 2021 attendance with the many SA and foreign candidates benefitting from Allen certification!

- **Densometer calibration in PE**

The local calibration facility cuts days from turnaround on service and annual leak tests. The Troxler team keep busy while demand for economical, compliant radionuclide transport sees our PrDP Dangerous Goods Class 7 vehicle doing countrywide rounds for SA radiation users.

- **QA instrumentation and weather monitoring**

Our comprehensive product range assures you of a real match to needs in civils, construction, and agriculture. Find the best of brands in certified test and measurement instruments for building materials, environmental recording, crops, gases, and even breath testing.

- **AquaVentures AI-based automation and control**

Visit our CIAC research and development aquafarm at the new Propella premises in Humewood. Innovative approaches to key elements in commercial aquaculture include online auto-feeding, power and pump control, and remote monitoring of water quality and quantity.

- **Surveying instruments pricing**

Technical advances continue to offset negative exchange rates. Growing in popularity, the **Disteo** at under R20K for layout handles angles and distances, while the **Comnav G200** GPS NTRIP kit produces centimeter accuracy at only R65K. Free training with new products!

Allens will be closed 21st December until 3rd January. Be free to use support lines:

Leica	082 381 6828	Topcon, Ruide, South	083 267 6418
Troxler	083 564 0613	Garmin GPS Support	011 791 0204
Geo-Fennel	082 339 3366	Spectra Lasers	082 569 6174
