INFRARED FOREHEAD
THERMOMETER**OVERVIEW:**

Infrared forehead thermometers detect body temperature quickly and in a non-invasive manner. They are particularly suitable for measuring the temperature of small children, even while they are sleeping. Forehead thermometers use an infrared sensor to measure the heat from the forehead. Studies have found forehead thermometers to be highly accurate.

SPECIFICATIONS:

- Measuring Range: 32.0 °C – 42.9 °C (89.6 °F–109.2 °F)
- Operating Voltage: DC 3V
- Measurement Method:
 - Non-touch with forehead about 1-2 sec
- 20 memories
- Operating Environment:
 - Temperature: 16 °C~ 35 °C (60.8 °F – 95 °F)
 - Humidity: 15% – 95% RH, non-condensing
 - Atmospheric pressure: 86 – 106 kPa
- Measuring principle: Infrared temperature sensing technique
- Size: 140 × 40 × 40mm
- Weight: (without batteries): 68 g
- 2 x AAA batteries (Not included)

SHIPPING DETAILS:

- CTN: 490 x 350 x 400 mm
- 100 pcs / ctn

**DISCLAIMER:**

- The manufacturer ensures quality of production by means of monitoring and inspection.
- This thermometer is designed to accommodate the basic safety requirements and standards for Personal Protective Equipment.
- The information contained herein is intended to assist the wearer in the selection of personal protective equipment.
- Actual conditions of use cannot be directly simulated in a test environment therefore it is the responsibility of the user and not the manufacturer or supplier to determine the suitability of the sanitizer for the intended usage.
